## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a digital signal processing apparatus and method, classified in class 340, subclass 5.1.
- II. Claims 18-26, drawn to a digital processing control or regulation method, system and medium utilizing an identifier to verify a data object and transmit the result, classified in class 713, subclass 179.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such that it performs a comparison of an information bearing item or signal with an information reference, and thus, performing a control function in accordance with the comparison.

Invention II has separate utility such that the digital data processing scheme determines the authenticity of a data object based on identification information and transmits the result. See MPEP § 806.05(d).

Because these invention are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification or due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
